## INTRODUCTORY NOTE

Since 1946 (and through 31 December 2013) the General Assembly of the United Nations (UNGA) had held 68 regular annual sessions, 10 emergency special sessions and 28 special sessions. As a result of those sessions the General Assembly adopted 16,436 resolutions. This compilation includes the following information for each of those resolutions: resolution number, date on which it was adopted, how it was adopted, origin of proposed draft, the number of the recorded vote corresponding a data bank, the item of the agenda under which it was adopted and the subject matter arranged under one of ten headings defined for this study.

### **1. Resolution number**

At the end of its sessions the Assembly takes a decision on its agenda items. It has done so in each of its sessions except in 1964 when, because of a financial crisis (there were simply no funds), the Assembly only discussed the impact of that crisis on the Organization.

The Assembly assigns a number to each one of the resolutions it approves. Between 1946 and 1975 they were numbered consecutively in Arabic numbers followed by a Roman numeral in parenthesis that indicates the session: the first of those resolutions was 1 (I) and the last was 3541 (XXX) of the thirtieth session in 1975. Since 1976 the Assembly has simplified the numbering of its resolutions, identifying them first by session and then by number: the first of these resolutions was 31/1 of the thirty-first regular session. Resolutions adopted in special or emergency sessions are identified by the initials S and ES, respectively.

When the Assembly adopts more than one resolution on a single item it adds a letter (following the English alphabet) after the number. Thus, for example, the 18 separate resolutions adopted under the item “General and Complete Disarmament” at its fiftieth session all came under the number “50/70” but are identified as “50/70 A”, “50/70 B”, etc., through “50/70 R”.

### **2. Date of adoption**

The date of adoption of a resolution is useful because it allows us to identify the chronological order of that resolution. There are many resolutions numbered A, B, C, etc. Often they were adopted on different dates. Moreover, until 1956 General Assembly resolutions were adopted and later assigned a number. The numbering of those resolutions does not necessarily reflect a chronological order of the dates of adoption. After 1957 they were assigned a number in the order of their adoption.

### **3. How the resolution was adopted**

Voting is the only procedure contemplated in the UN Charter (Article 18) and reproduced (and broadened) in the General Assembly’s Rules of Procedure (articles 82 to 95) for the adoption of resolutions. The General Assembly, however, may decide to adopt them without a vote. At times, the presiding officer has announced that a certain resolution was adopted “unanimously” and in recent years the expression “by consensus” has been used occasionally. The fact remains that the General Assembly can adopt a resolution by a vote or without one.

Those adopted without a vote are identified with a blank space and those voted upon include the votes: in favor, against and abstentions. The adoption of resolutions by a vote can be by a roll-call, by a recorded vote or a non-recorded vote. The non-recorded votes appear shaded. In 1966 a mechanical voting system was installed.

#### **4. Origin of resolution**

On 29 January 1946 the General Assembly appointed six Main Committees: First Committee (Political and Security [including the regulation of armaments]); Second Committee (Economic and Financial); Third Committee (Social, Humanitarian and Cultural); Fourth Committee (Trusteeship including non-self-governing territories); Fifth Committee (Administrative and Budgetary); and Sixth Committee (Legal). As early as 1948, however, it became necessary to establish an additional committee, the Special or *Ad Hoc* Political Committee, to examine some of the items originally assigned to the First. It should also be recalled that in the early sessions some items were considered jointly by two and even three main committees.

In September 1993, after lengthy consultations, the General Assembly reduced the number of its Main Committees from seven to six, “to respond better to the requirements of the new phase of international relations” (resolution 47/233). This was achieved by merging the Fourth with the Special Political Committee, now known as the “Special Political and Decolonization Committee (Fourth Committee)”. The Assembly also changed the First Committee’s name to “Disarmament and International Security Committee”. The other committees (Second, Third, Fifth and Sixth) remained unchanged.

Each committee considers the items assigned to it and reports the results of its debates to the Plenary. Those reports usually contain draft resolutions approved by the committee and thus recommended to the Plenary for adoption by the General Assembly. Most draft resolutions are drawn up by a single delegation or a group of delegations that then become the sponsors of the draft. The draft is then presented or “introduced” to the committee by the principal sponsor. Occasionally, a draft resolution is put forward by the committee chairperson. This procedure facilitates the circulation of drafts containing compromise texts which the interested delegations are unwilling to submit themselves.

Resolutions can also be submitted directly to the Plenary. These are identified by the letter “P” and those based on recommendations of a committee by the numbers 1 to 6, and the *Ad Hoc* Committee, identified initially as AHC and then as SP (Special Political Committee) and later as SPD (Special Political and Decolonization Committee).

#### **5. Data bank reference**

Since 1946 (and through 31 December 2013) the General Assembly had adopted 16,436 resolutions: 10,283 were approved without a vote and 6,153 by a vote. Only 4,501 of those votes were recorded. However, some of those votes served to adopt more than one resolution at the same time. Thirteen of those votes served to adopt two resolutions and one resulted in the adoption of three resolutions.<sup>1</sup>

The data bank includes the 4,486 *separate* recorded votes in chronological order of their adoption.

#### **6. Agenda items**

The agenda item of each resolution is given. Those identified with a ● are the same as the preceding item.

#### **7. Subject of resolution**

The resolutions have been grouped according to their subject matter under the following ten headings: United Nations budget; political matters; international security and non-nuclear

---

<sup>1</sup> Those resolutions are 100 A and B (I), 2890 A and B (XXVI), 3537 A and B (XXX), 31/141 A and B, 32/4 B and C, 35/220 A and B, 38/38 A and B, 38/226 A and B, 39/71 A and B, 40/239 A and B, 40/257 A, B and C, 42/70 A and B, 50/38 A and B, and 61/128 A and B.

disarmament; nuclear disarmament; economic matters; social matters; codification of International Law; decolonization; Middle East/Palestine; and southern Africa. Some resolutions are included under more than one heading.

One final observation is in order. This compilation includes all resolutions adopted by the General Assembly. On occasion, and in order to save time, the presiding officer has proposed that two or more draft resolutions under the same agenda item be adopted by a single decision. For example, resolutions 53/208 A, B, C, D and E under the item “Pattern of conferences” were adopted on 18 December 1998 without a vote and by a single decision (document A/53/PV.93). These are listed as five separate resolutions. Similarly, on 18 December 1985 the General Assembly adopted resolutions 40/239 A and B on the “Programmebudget for the biennium 1984-1985” by a single recorded vote of 125 in favor, 12 against and ten abstentions. These resolutions have also been listed separately and therefore counted twice. That recorded vote, however, is included only once in the data bank.

This compilation comprises three volumes. This first volume provides a summary of the results of the compilation. It includes tables, graphs and figures, as well as a description of both the significance of negative votes cast against resolutions adopted by the General Assembly and the Coincidence Index and its median as a tool to study the voting patterns of Member States.

Volume II contains Part I of the compilation. It lists the 16,436 resolutions adopted by the United Nations’ General Assembly in chronological order. Its more than 400 pages have been divided as follows to facilitate its downloading: pages 1-142, 143-282, 283-420, and 421- .

Volume III contains Parts II to V. Part II lists the 4,501 resolutions adopted by a recorded vote. Part III identifies the countries that cast negative votes on those resolutions. Part IV lists those countries found in the verbatim records of the plenary meetings of the General Assembly that cast negative votes on the 1,652 resolutions adopted by a non-recorded vote. Part V distributes the 4,501 resolutions adopted by a recorded vote under the ten subject headings identified for this study.

This compilation was published in 2011 by the United Nations. This is a revised version.

## COUNTRY ABBREVIATIONS

United Nations Member States are identified with the following abbreviations. Those in *italics* have ceased membership.

|                |                                       |            |                                   |

**YEARLY AVERAGE TOTAL VOTES ON UNGA RESOLUTIONS**

| Year      | Yes (per cent) | No   | Abstention |
|-----------|----------------|------|------------|
| 1946      | 38.1           | 4.6  | 4.8        |
| 1950      | 44.1           | 3.6  | 4.9        |
| 1960      | 72.4           | 3.8  | 11.2       |
| 1970      | 95.7           | 4.4  | 12.1       |
| 1980      | 115.4          | 6.7  | 16.5       |
| 1990      | 129.9          | 4.1  | 13.6       |
| 2000      | 134.1          | 8.8  | 18.0       |
| 2005      | 140.0          | 11.6 | 19.4       |
| 2010      | 145.1          | 12.7 | 18.4       |
| 1946-2013 | 106.7          | 5.9  | 14.4       |

Total votes cast since 1946 and through 31 December 2013:

|                          | Yes     | No     | Abstention |
|--------------------------|---------|--------|------------|
| Total on all resolutions | 656,464 | 36,416 | 88,900     |
| Most on one resolution   | 188     | 71     | 105        |
| Least                    | 14      | 0      | 0          |

## THE SIGNIFICANCE OF NEGATIVE VOTES

The following tables contain information on the negative votes cast against resolutions adopted by the United Nations' General Assembly. At its first session in 1946 the General Assembly adopted 44 resolutions by a vote. They received an average of 38.1 votes in favor, 4.6 against and 4.8 abstentions. With the increase UN Member States, it was to be expected that those averages would also grow. But that is not exactly what happened.

Over the years the affirmative votes and abstentions have risen steadily. The evolution of the negative votes, however, reveals that in 1950, 1960, 1970 and 1990 the average fell to 3.6, 3.8, 4.4 and 4.1, respectively, that is, *below* the 1946 level. Since then it has climbed to 13.3 (Table 4).

Since 1946 the General Assembly has adopted 6,153 (or 37 percent) of its resolutions by a vote. There is a record for almost three-fourths of those votes. However, it has been possible to trace and identify the paternity of 57% (2,436 of 4,285) of the negative votes cast against resolutions adopted by a non-recorded vote. This was done through the explanations of vote contained in the verbatim records of the meetings.

Through 31 December 2013, 36,416 votes had been cast against resolutions adopted by the General Assembly. There have been, of course, many thousands more negative votes if one takes into account all other votes that have taken place in the Assembly, that is, those that resulted in the *rejection* of a draft resolution or those taken separately on preambular or operative paragraphs of countless draft resolutions. On occasion separate votes have even been requested on one or two words of the text of a draft resolution. Here we have examined only the votes on draft resolutions adopted *as a whole* and the countries that rejected them.

What is the significance of the negative votes cast against General Assembly resolutions? To begin with, they are, in the main, a clear and convincing signal of rejection of the majority's will. They are the formal expression of disagreement with a resolution's content or part of the text. That inconformity can be the result of several considerations, some philosophical and, more often, political—an objection to the ideology that seems to be behind certain pronouncements. This occurred in the seventies and eighties, for example, with resolutions on the establishment of the New International Economic Order and, more recently, with those on the so-called right of humanitarian intervention with which some wish to endow the Organization. Other negative votes are motivated by more mundane considerations: because they refer to a country by its name (the complaints in the 1980s regarding so-called “name-calling”) or because they condemn an act committed by a State (human rights violations, colonialism, aggression, etc.).

The fact is that of the three votes possible—in favor, against or abstention—the negative votes are the most interesting. A country can go along with the majority without much enthusiasm, almost by inertia, and thus avoid distinguishing itself from the rest. It can also seek the comfort that goes with the limbo of an abstention. But to vote “no” is often an imperative necessity, an act of conviction (for large, medium and small countries) or the result of bilateral pressure of larger nations. To go against the will of the majority thus requires a decision that can have some unpleasant consequences for the country in question, especially if it is a relatively small one.

**TABLE 5**  
**NEGATIVE VOTES CAST AGAINST RESOLUTIONS ADOPTED BY THE UNGA,**  
**1946—2013**

Through 31 December 2013 the General Assembly had adopted 6,153 resolutions by a vote: 2,109 (34.3 per cent) without any negative votes, 3,021 (49.1%) with one to ten, 593 (9.6%) with 11-20, 174 (2.8%) with 21-30, 52 (0.8%) with 31-40, 104 (1.7%) with 41-50, 95 (1.5%) with 51-60 and 5 (0.08%) with 61-71.

| Negative votes | Total resolutions | Total votes | Negative votes | Total resolutions | Total votes |
|----------------|-------------------|-------------|----------------|-------------------|-------------|
| 0              | 2109              | 0           | 37             | 3                 | 111         |
| 1              | 743               | 743         | 38             | 2                 | 76          |
| 2              | 753               | 1506        | 39             | 9                 | 351         |
| 3              | 311               | 933         | 40             | 3                 | 120         |
| 4              | 166               | 664         | 41             | 8                 | 328         |

## THE COINCIDENCE INDEX AND ITS MEDIAN

United Nations General Assembly (UNGA) resolutions are a concrete expression of world opinion on a wide variety of multilateral issues. The analysis of the votes cast by States on those issues is one way of taking the pulse of the international situation at a given moment. A comparison of those votes can lead to a better understanding of the UN and of the attitude of individual countries towards the Organization. Therein lies the value of studying General Assembly voting patterns. However, it is difficult to devise a method to measure objectively the degree to which countries agree or disagree at the UN.

Voting patterns at the UN General Assembly have long been analyzed. Votes have been compared and the question asked is, Who votes with whom on a given issue? Statistics are compiled and conclusions drawn. Some analysts have approached the subject of voting at the UN as an academic exercise; others have more specific objectives in mind and certain governments have gone so far as to link votes to the level of their foreign aid to other countries.

Some governments have identified the ten or so resolutions which most interest them and have then compared their own votes to those of others. But this tends to be a highly subjective exercise. A few non-governmental organizations have approached the problem with more objectivity. After identifying the most important resolutions adopted at a session, they analyze each nation's vote according to a set of predetermined criteria, such as the World Federalists' "World Order Values".

It would, of course, be most useful to have a set of agreed criteria with which to analyze and evaluate each country's votes. One could think in terms of the UN Charter's purposes and principles. But even here there is the risk of some degree of subjectivity, since on any issue there can be conflicting interpretations of the Charter's provisions. The fact is that year after year UN Members are called upon to define their position by voting on a variety of resolutions. And deciding how to vote is not always easy. Voting is the culmination of the Assembly's debates. That is to be expected in a body whose decision-making process is based on democratic principles.

It is true that the General Assembly has adopted well over half of its resolutions without a vote. But resolutions on the most controversial issues are almost always put to a vote, and it is precisely those resolutions that allow us to study and compare the attitude of Member States towards certain crucial problems of international relations.

When a resolution is put to a vote, delegations may vote "Yes", "No" or "Abstention". They may also opt "to absent themselves" from the room. Finally, they may decide to remain in the room but announce that they are "not participating" in the vote.

Let us examine the UNGA voting records of UN Members and attempt to measure the extent of agreement among them. To do so, we shall rely on three analytical tools: the Coincidence Index devised for this study, the grouping of resolutions according to issues, and the median.

How often did country A vote the same as country B? When they voted differently, was it a case of "Yes/No" or did it involve abstentions? How does one take into account absences (genuine or self-imposed) or "announced non-participation" (which is really an absence)? The Coincidence Index (CI) is designed to answer those questions. If country A always votes "Yes" while country B always votes "No", their CI is zero; if they always vote the same, their CI is 1000. Between these two extremes one can find all UN Members.

To determine the CI, begin by eliminating those votes in which one (or both) of the countries being compared was absent. Then add all those times in which they voted the same: Yes/Yes,

No/No or Abstention/Abstention. To each of those “coinciding” or identical votes assign a value of two; and, in order to differentiate between a Yes/No, on the one hand, and a Yes/Abstention or a No/Abstention, on the other, assign to the latter a value of one. The formula is quite simple:

$$CI = \frac{2 \text{ (total identical votes)} + (\text{total Abstention/Yes} + \text{Abstention/No})}{2 \text{ (total resolutions both voted)}}$$

The CI is only a tool for comparing the votes of any two given States. It does not pretend to judge the content of the resolution being voted. That would be an exercise fraught with danger. It simply takes into account how often the votes were identical (Yes/Yes, No/No and Abs/Abs), different (Abstention/Yes or Abstention/No) or opposite (Yes/No).

The CI appears to produce less distortion than other methods. For example, in its annual “Report to Congress on Voting Practices in the United Nations”, the US State Department seeks to ascertain the “percent coincidence of a country’s votes with the United States, calculated on the basis of Yes/No votes only and does not take into account abstentions or absences”. This approach can skew the results since it tends to exaggerate the extremes: it magnifies the extent of agreement or disagreement and thus appears greater or smaller than the CI (Table A). Abstentions do matter and should be included in the calculations.

A computer program was written following the CI method and a data base was created from

TABLE A  
*Coincidence of US votes with the UK and the USSR (Russia):  
a comparison of the results using two different methods*

|                              | 1950 | 1960 | 1970 | 1980 | 1990 | 2000 | 2010 |

| Coincidence Index            | 342  | 597  | 333  | 324  | 262  | 403  | 312  |

the 4,486 recorded votes since 1946 on Assembly resolutions, indicating the votes cast by every UN Member State (yes, no, abstention or absent). A file was opened for each country that has participated in those votes and, by the end of December 2013,

the data bank contained 879,256 entries. The computer did the rest.

The mountain of the compiled data had to be distilled and its presentation had to be condensed. In order to focus the analysis and trace the evolution of the voting patterns, the study was divided over time and by subject. It was relatively easy to identify the most important items debated in the Assembly in order to examine how the CI varied from one issue to another. They have been grouped under the following ten headings:

1. United Nations Budget
2. Political
3. International security and non-nuclear disarmament
4. Nuclear disarmament
5. Economic
6. Social
7. Codification of International Law
8. Decolonization
9. Middle East/Palestine
10. Southern Africa

Table B lists the number of resolutions included under each of those headings.

TABLE B

*Subjects of the 4,486 UNGA resolutions adopted by a recorded vote  
and included in the data bank*

| Subject                                            | Number of resolutions |
|----------------------------------------------------|-----------------------|
| United Nations Budget                              | 263                   |
| Political matters                                  | 423                   |
| International security and disarmament             | 1207                  |
| International security and non-nuclear disarmament | 573                   |
| Nuclear disarmament                                | 634                   |
| Economic matters                                   | 191                   |
| Social matters                                     | 576                   |
| Codification of International Law                  | 150                   |
| Decolonization                                     | 501                   |
| Middle East                                        | 1060                  |
| Southern Africa                                    | 458                   |
| <i>Apartheid</i>                                   | 271                   |
| Namibia                                            | 111                   |
| Other                                              | 76                    |
| Total*                                             | 4829                  |

\* Includes resolutions listed under more than one subject.

The General Assembly's agenda has changed over the years. During its first four decades the number of agenda items grew almost constantly, especially in the 1970s and early 1980s. Then it declined and has been more or less stable since the early 1990s. These changes are reflected in the resolutions adopted by a recorded vote. Those resolutions allow us to study the evolving interests of UN Member States on a variety of subjects that continue to divide the General Assembly. The following figures attempt to show that evolution.

Figure A

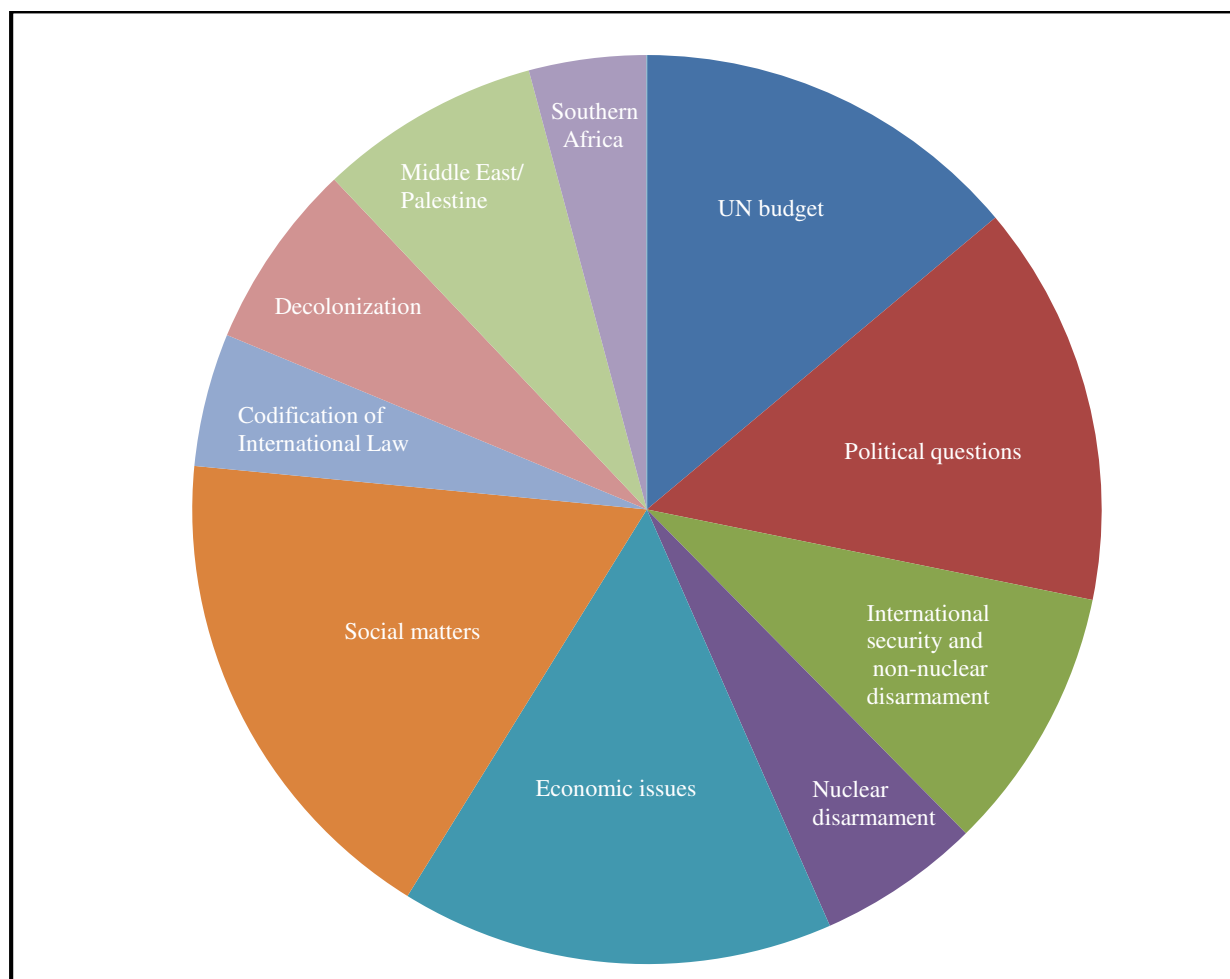

*All UNGA resolutions by subject*

Figure B

*UNGA resolutions adopted by a **recorded** vote by subject*

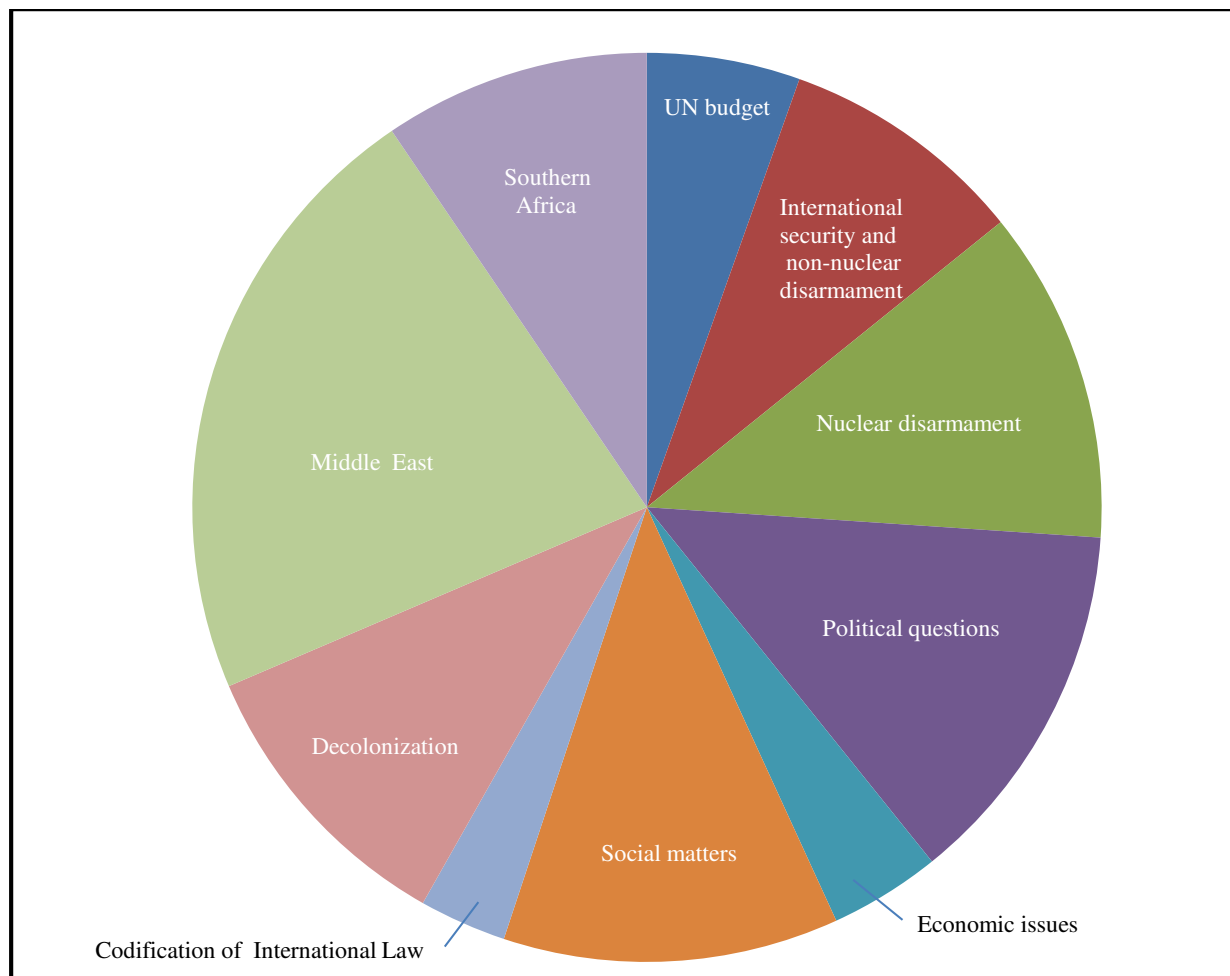

Figure C

*All UNGA resolutions by subject: Yearly average of five-year totals*

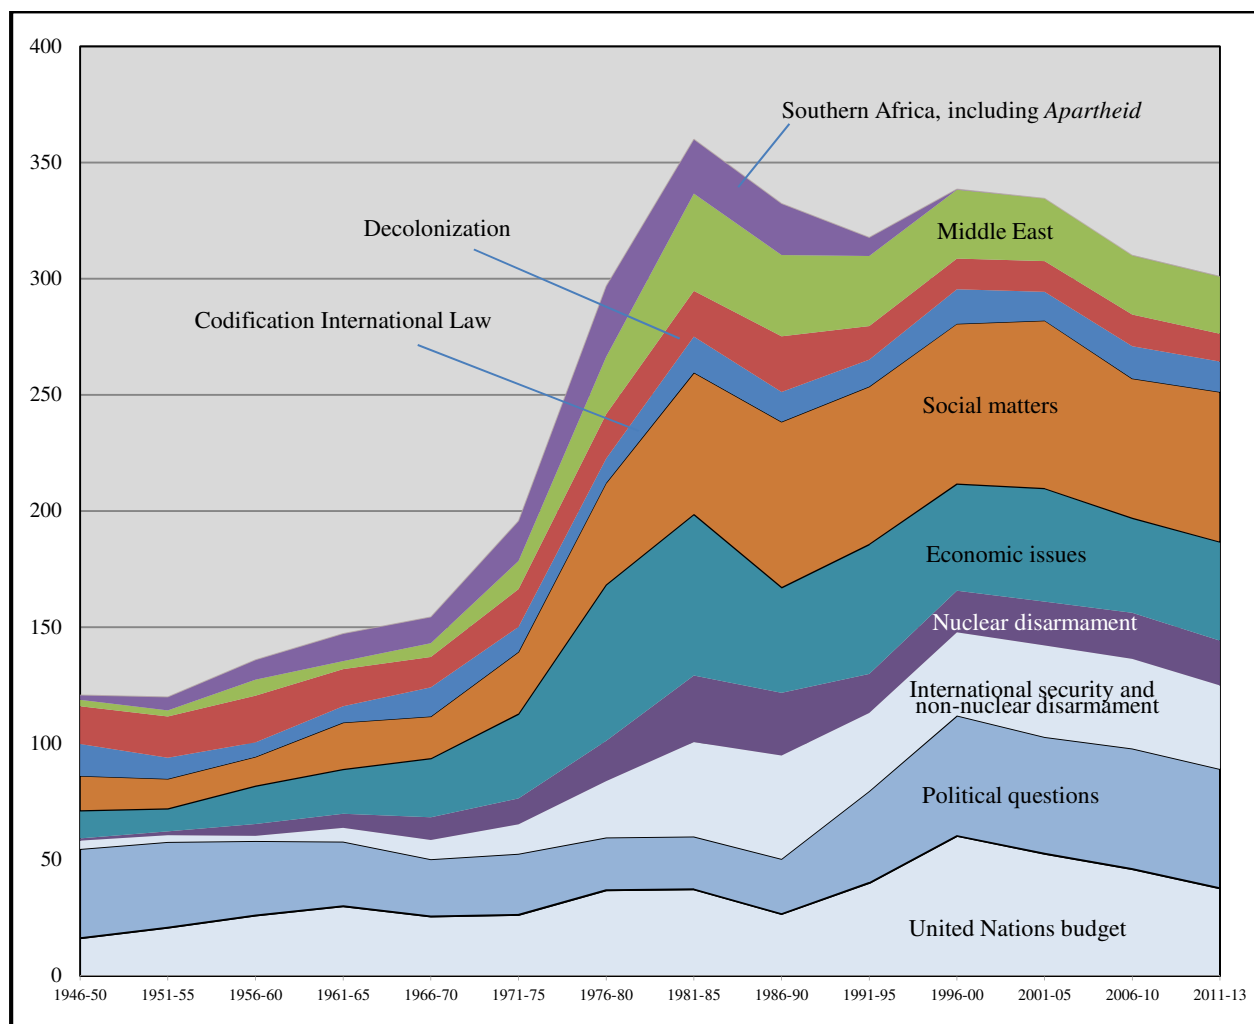

Figure D

UNGA resolutions adopted **without a vote** by subject: Yearly average of five-year totals

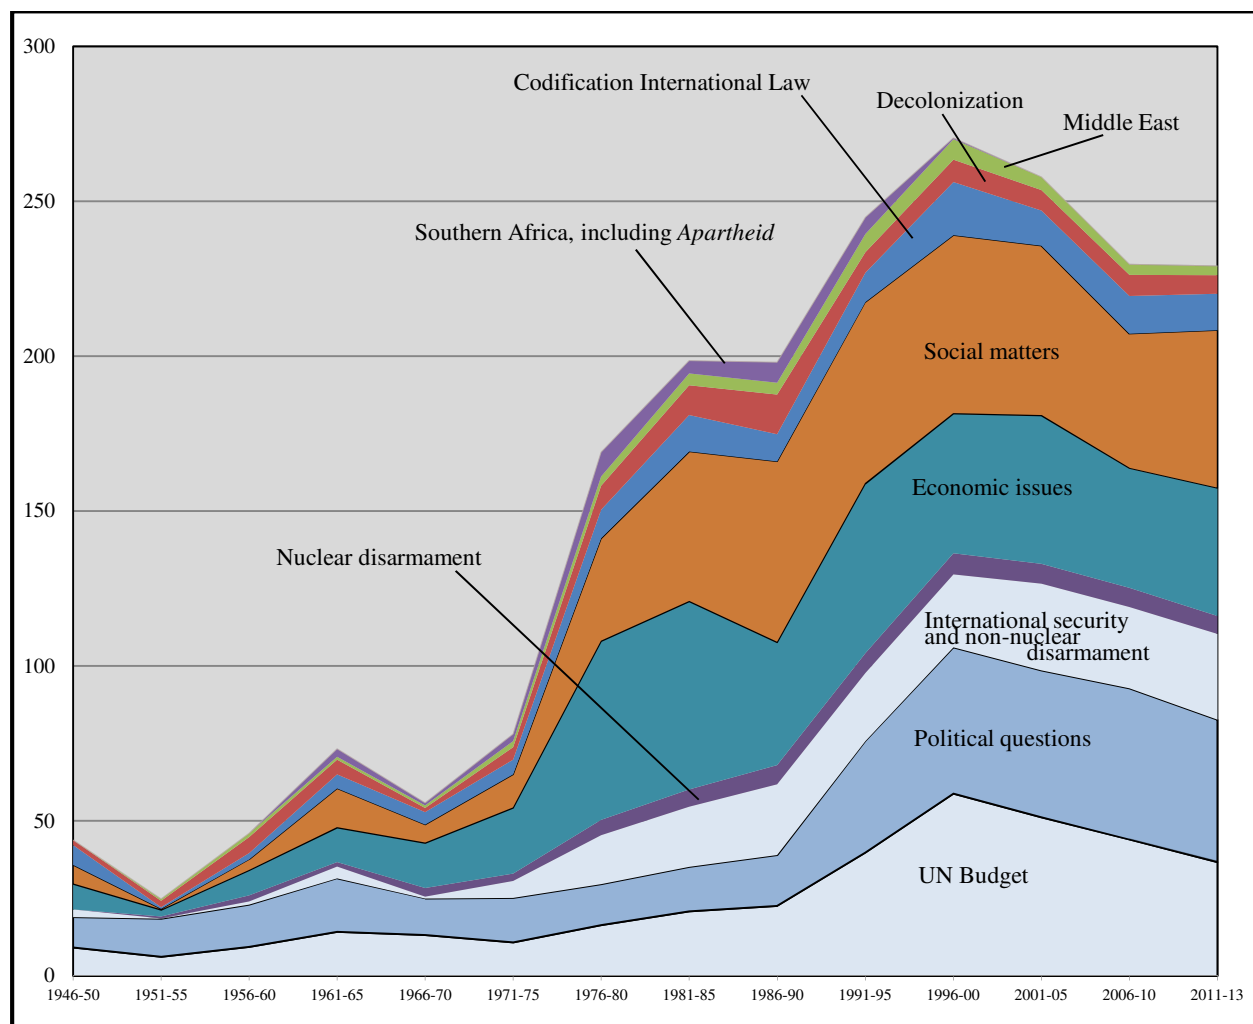

Figure E

UNGA resolutions adopted **by a vote** by subject: Yearly average of five-year totals

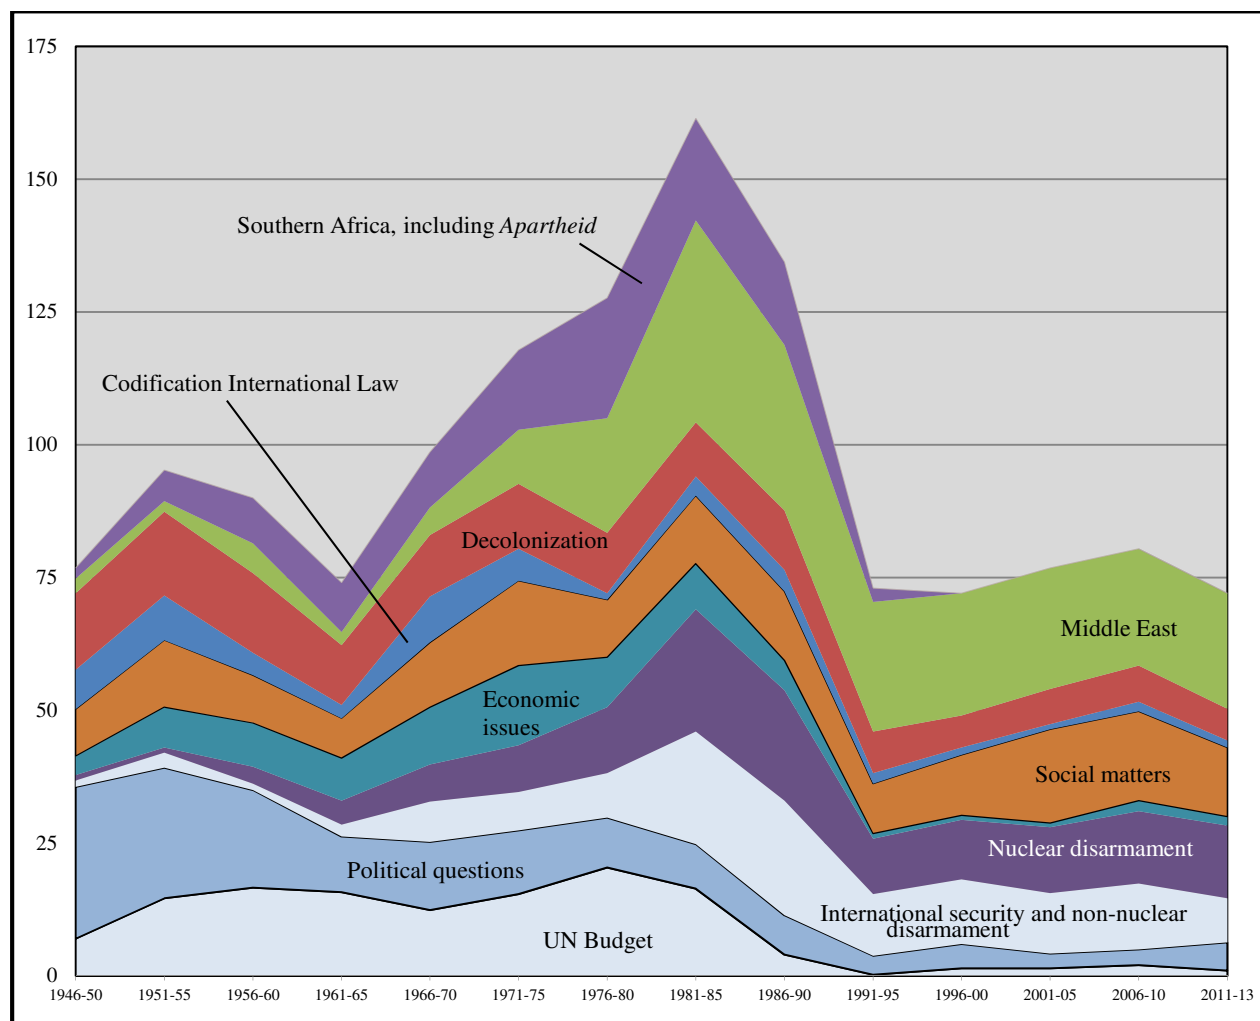

Figure F

How UNGA resolutions were adopted: Total by subject (per cent)

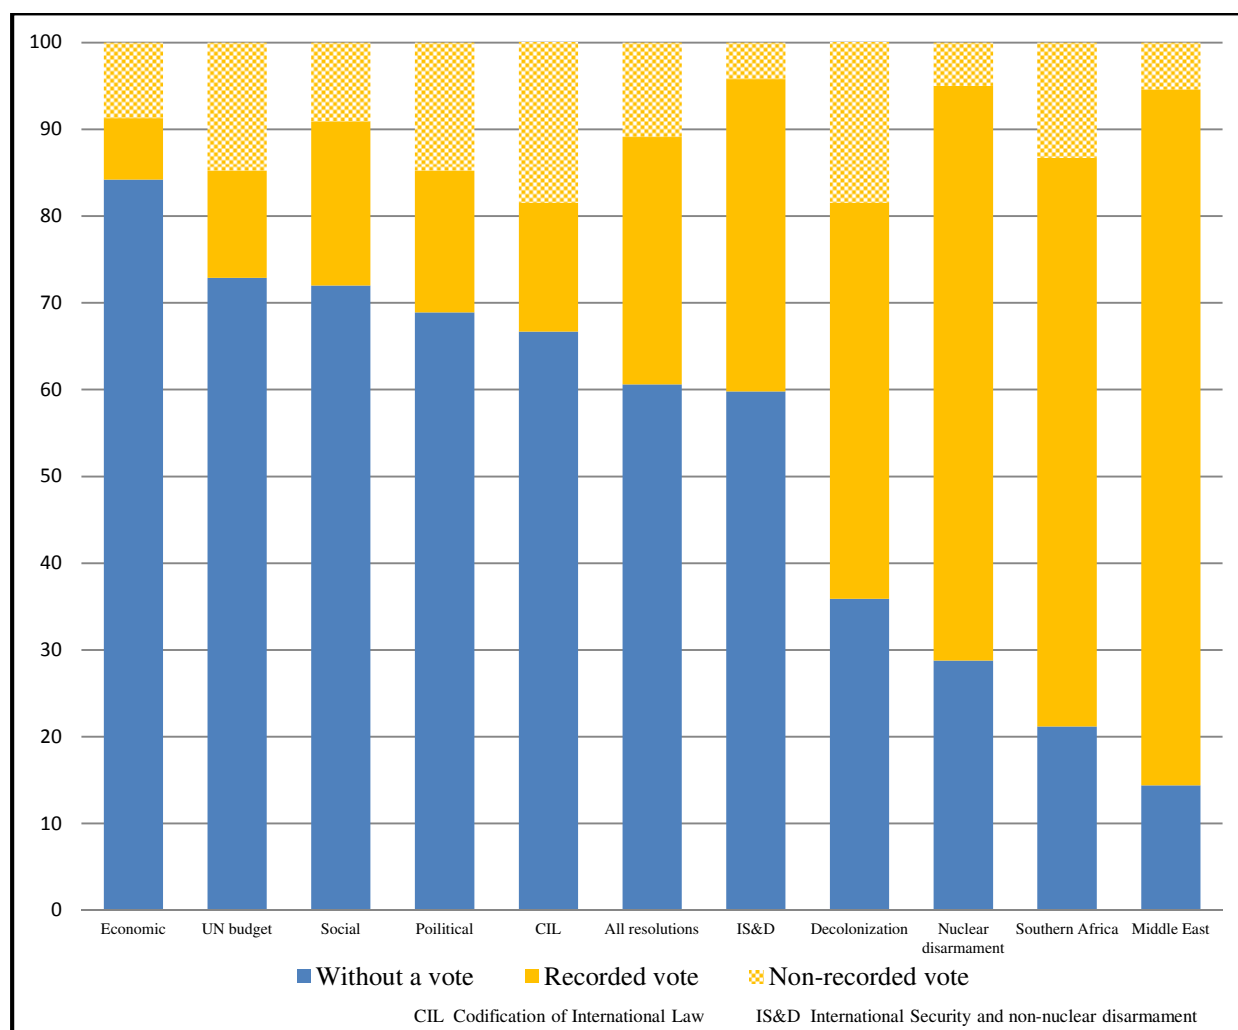

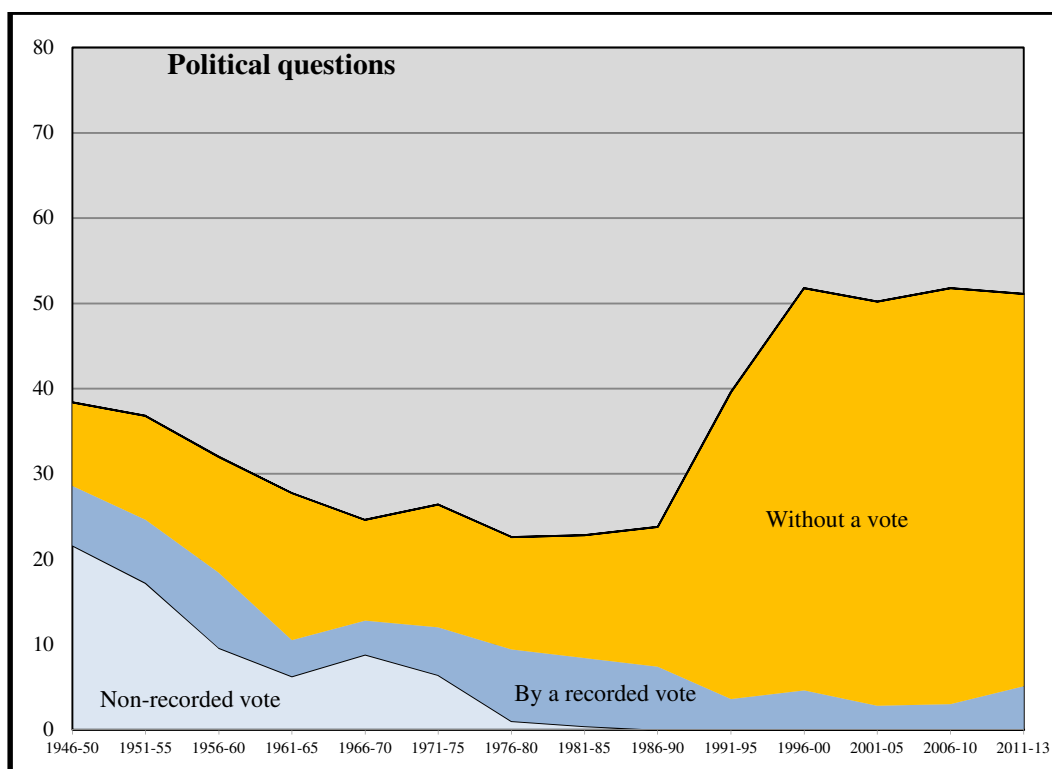

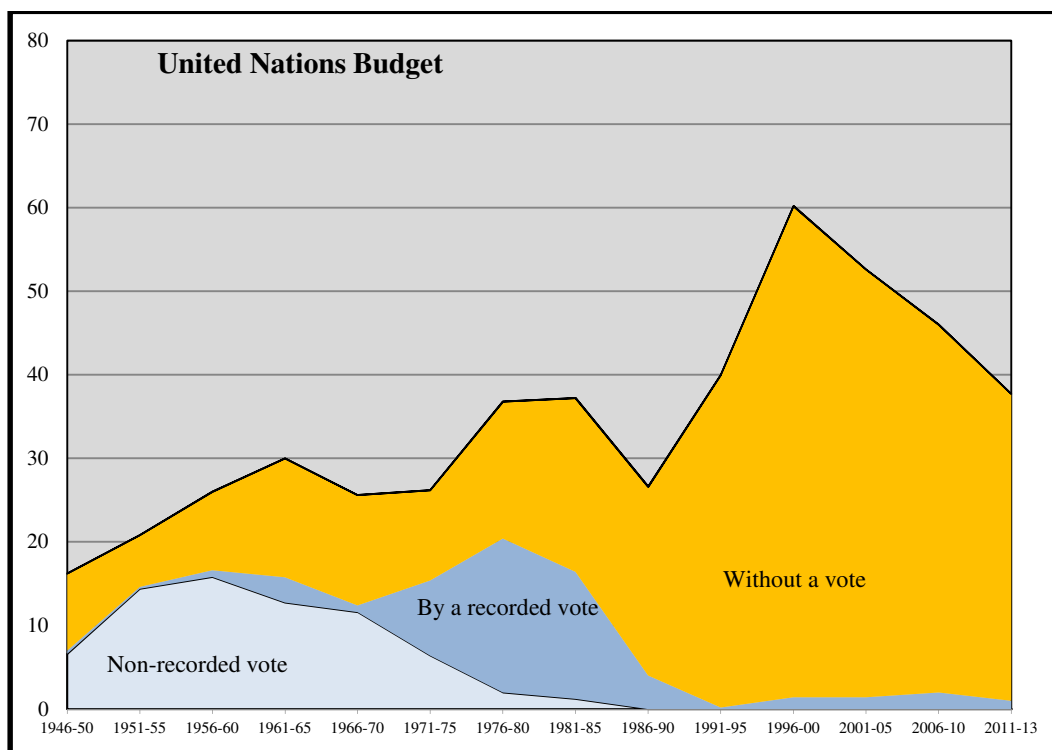

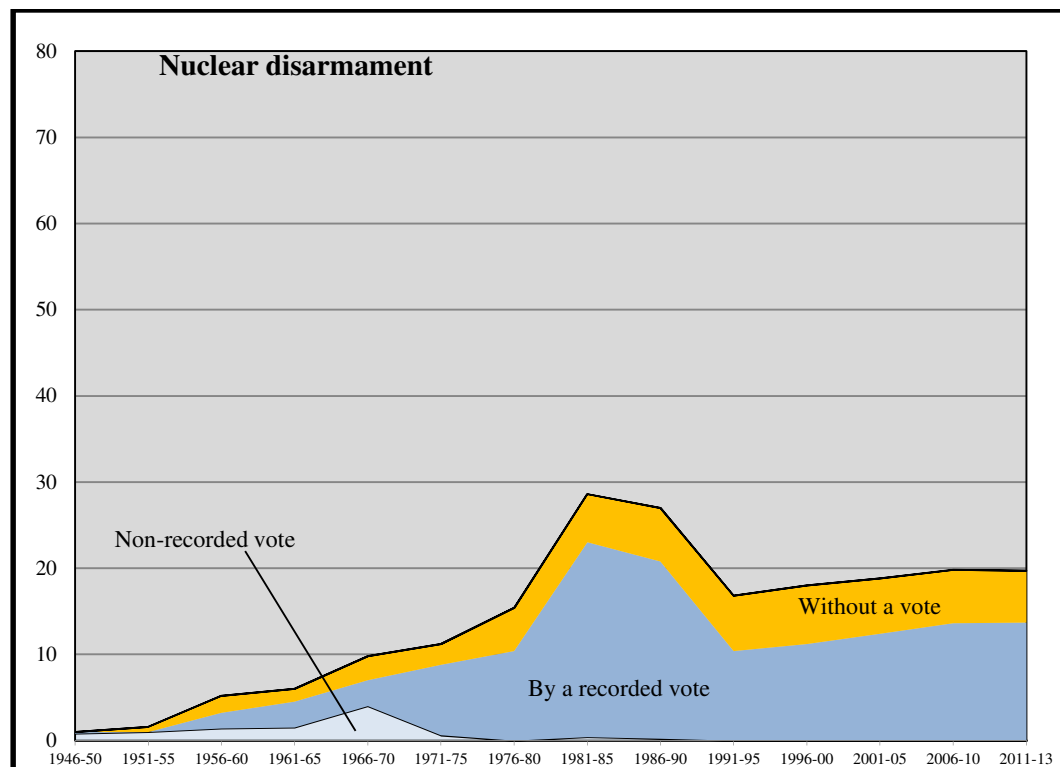

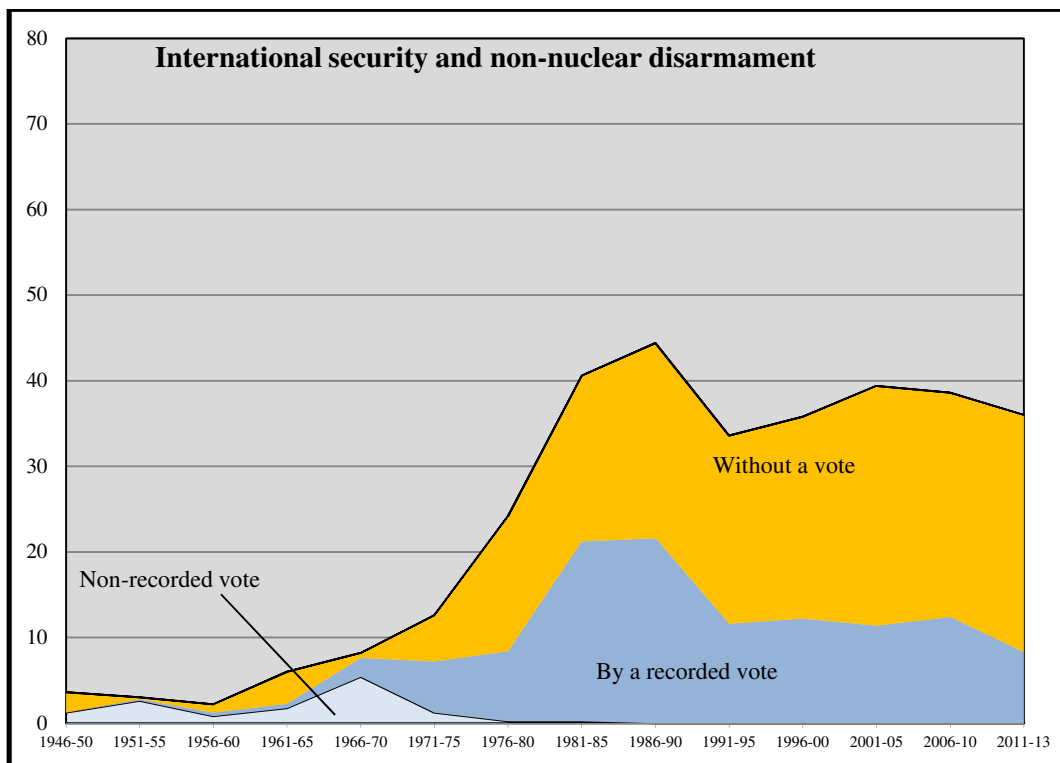

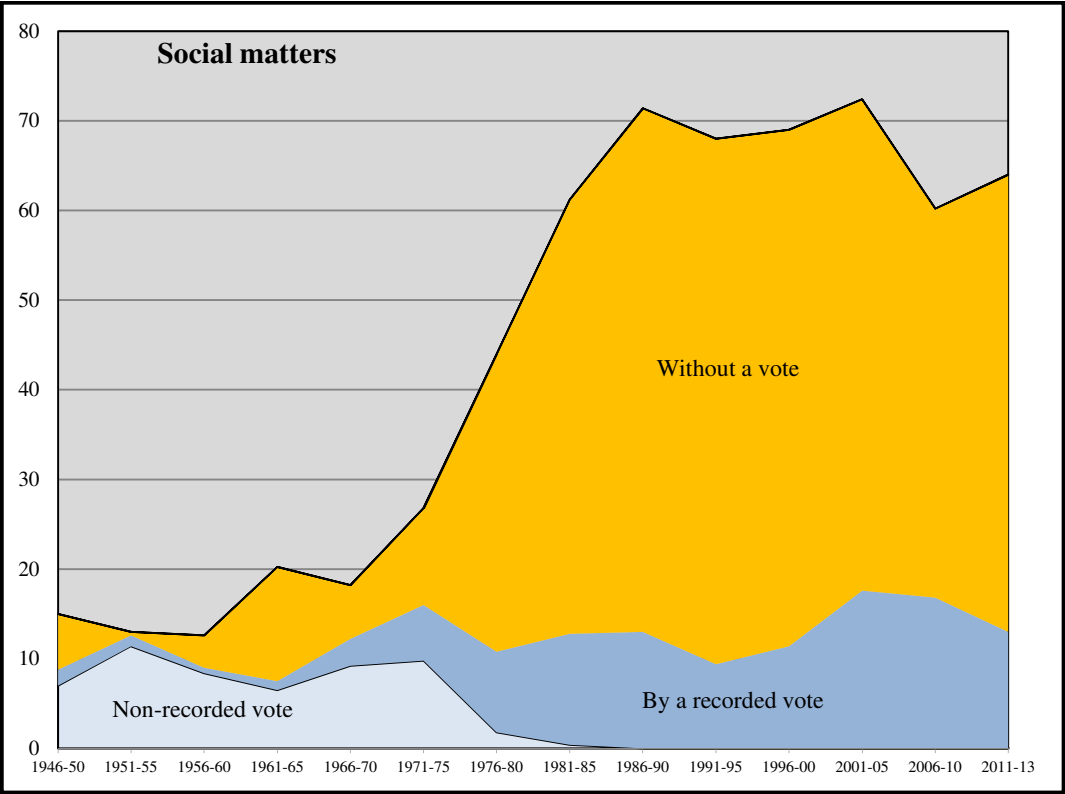

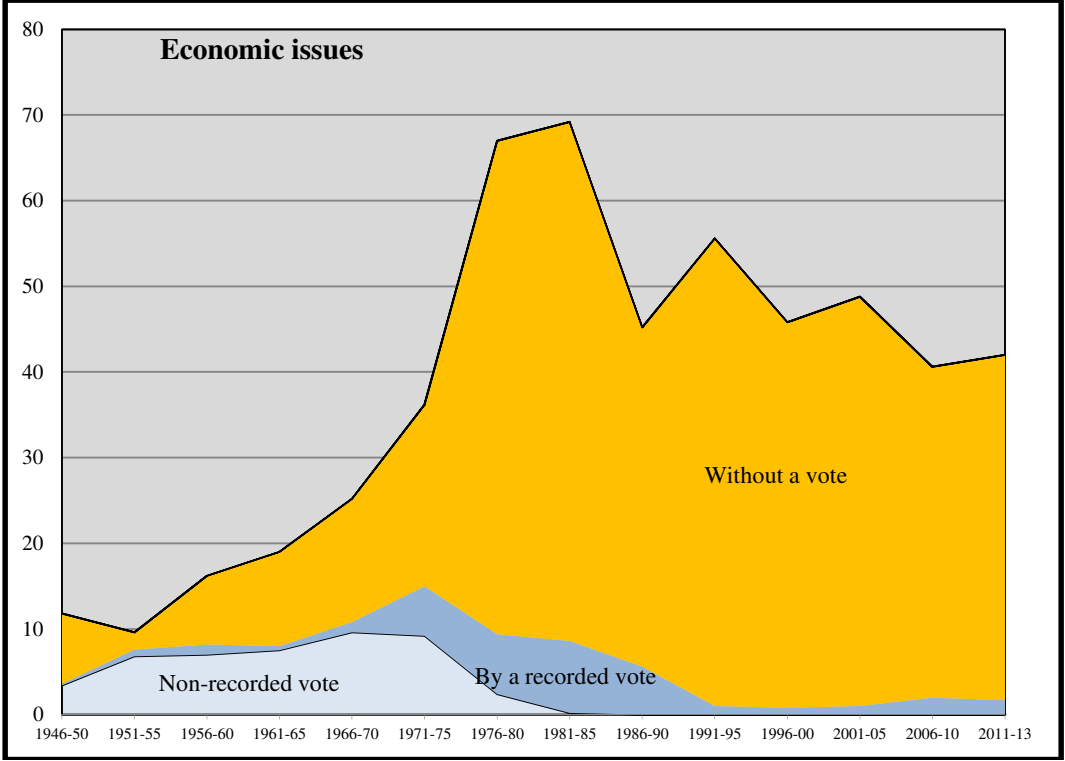

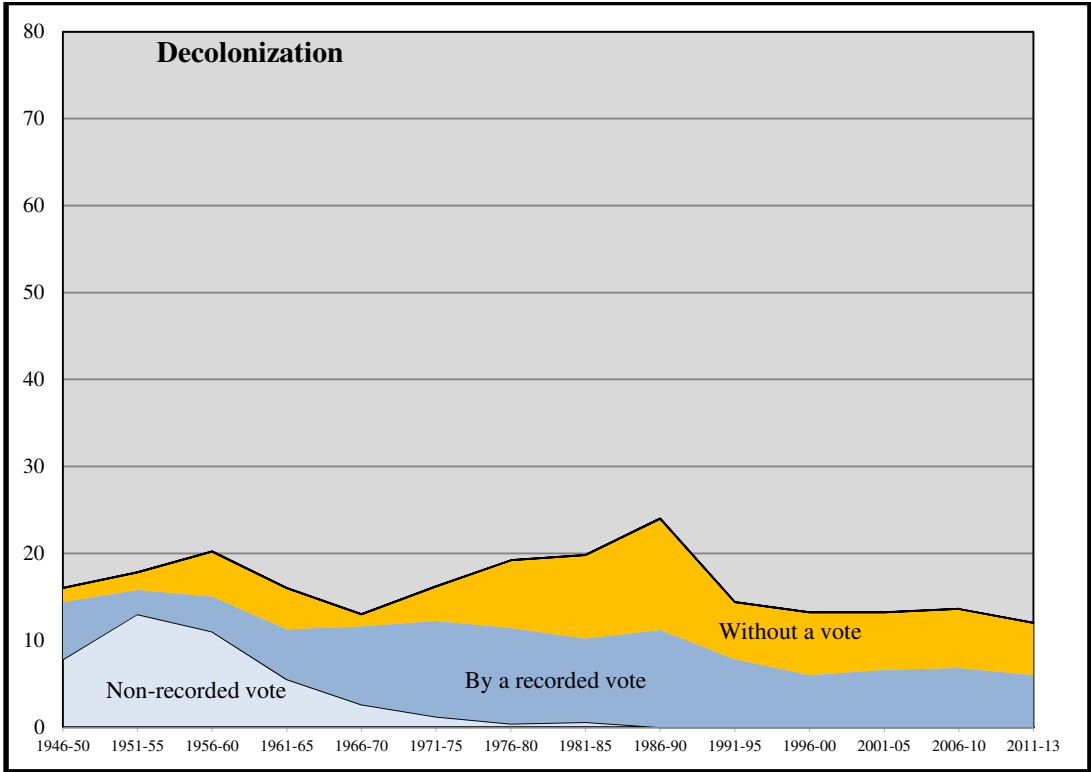

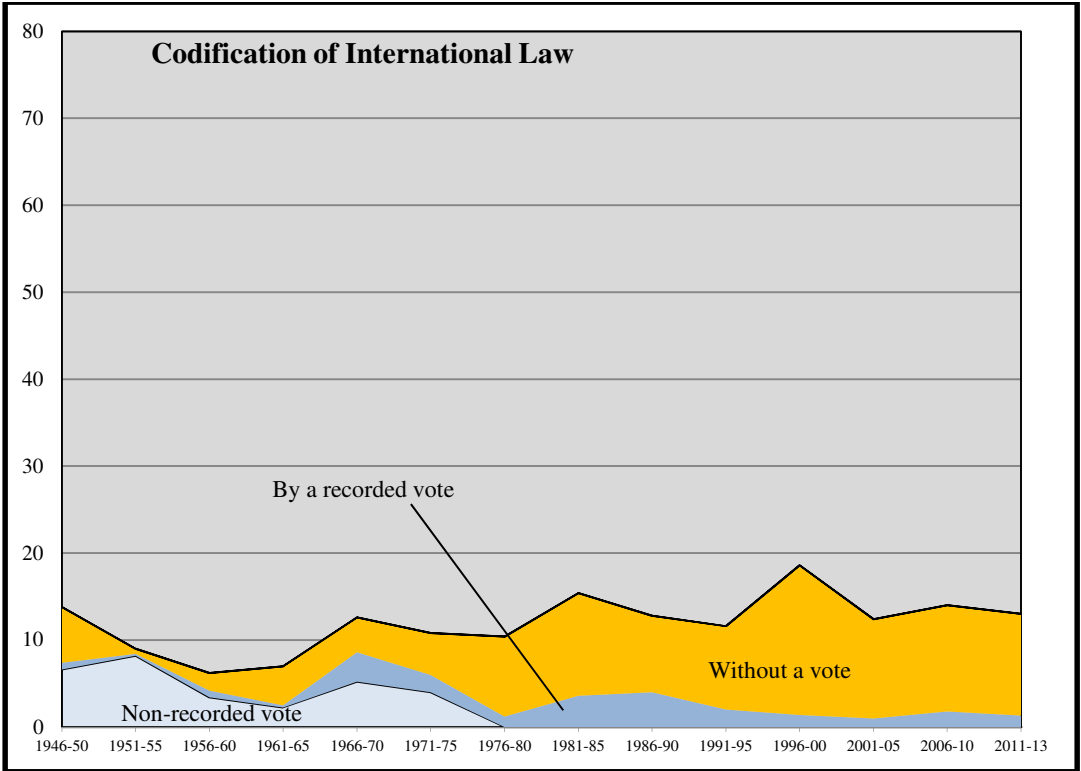

Figure G

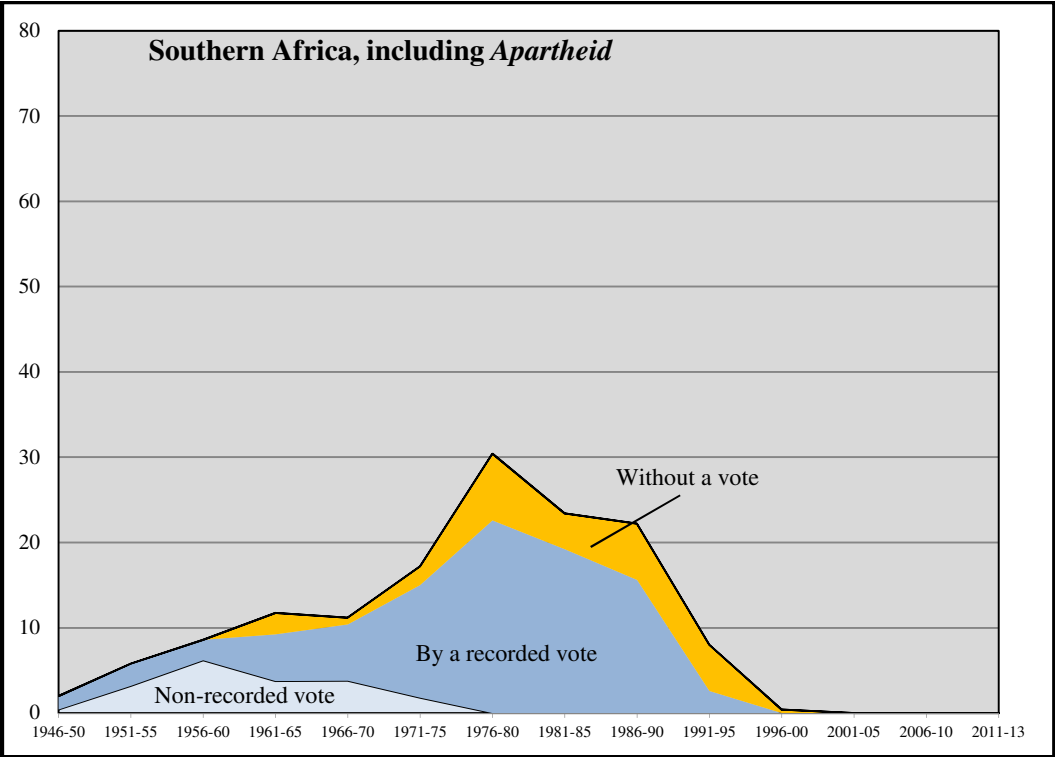

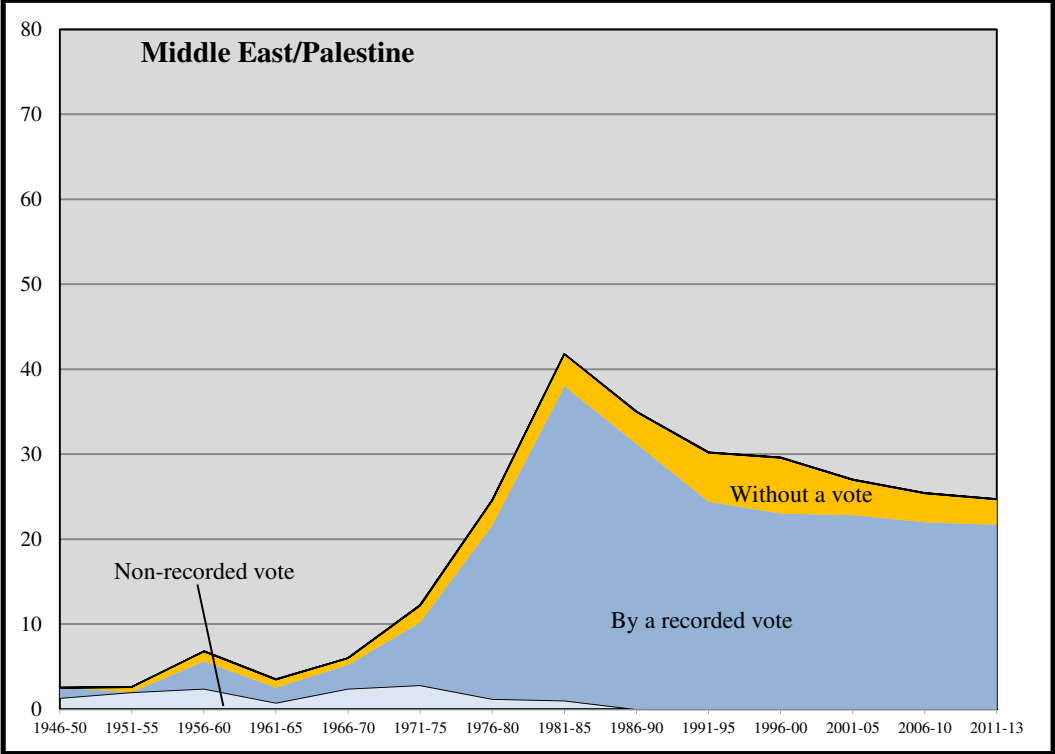

How UNGA resolutions were adopted: by subject (yearly average of five-year totals)

The basic tool employed in this study is the median, or the point at which UN Member States are divided into two equal parts. And countries have been grouped according to the UN's regional divisions. In Table C other groups are included for the sake of comparison. Graph B offers an example of how the median of the Coincidence Index has evolved over the years.

TABLE C  
*Median of the Coincidence Index among UN Member States*

|                                        | Median of the<br>Coincidence Index |

| Group of 77, 1946-2013***              | 933                                |

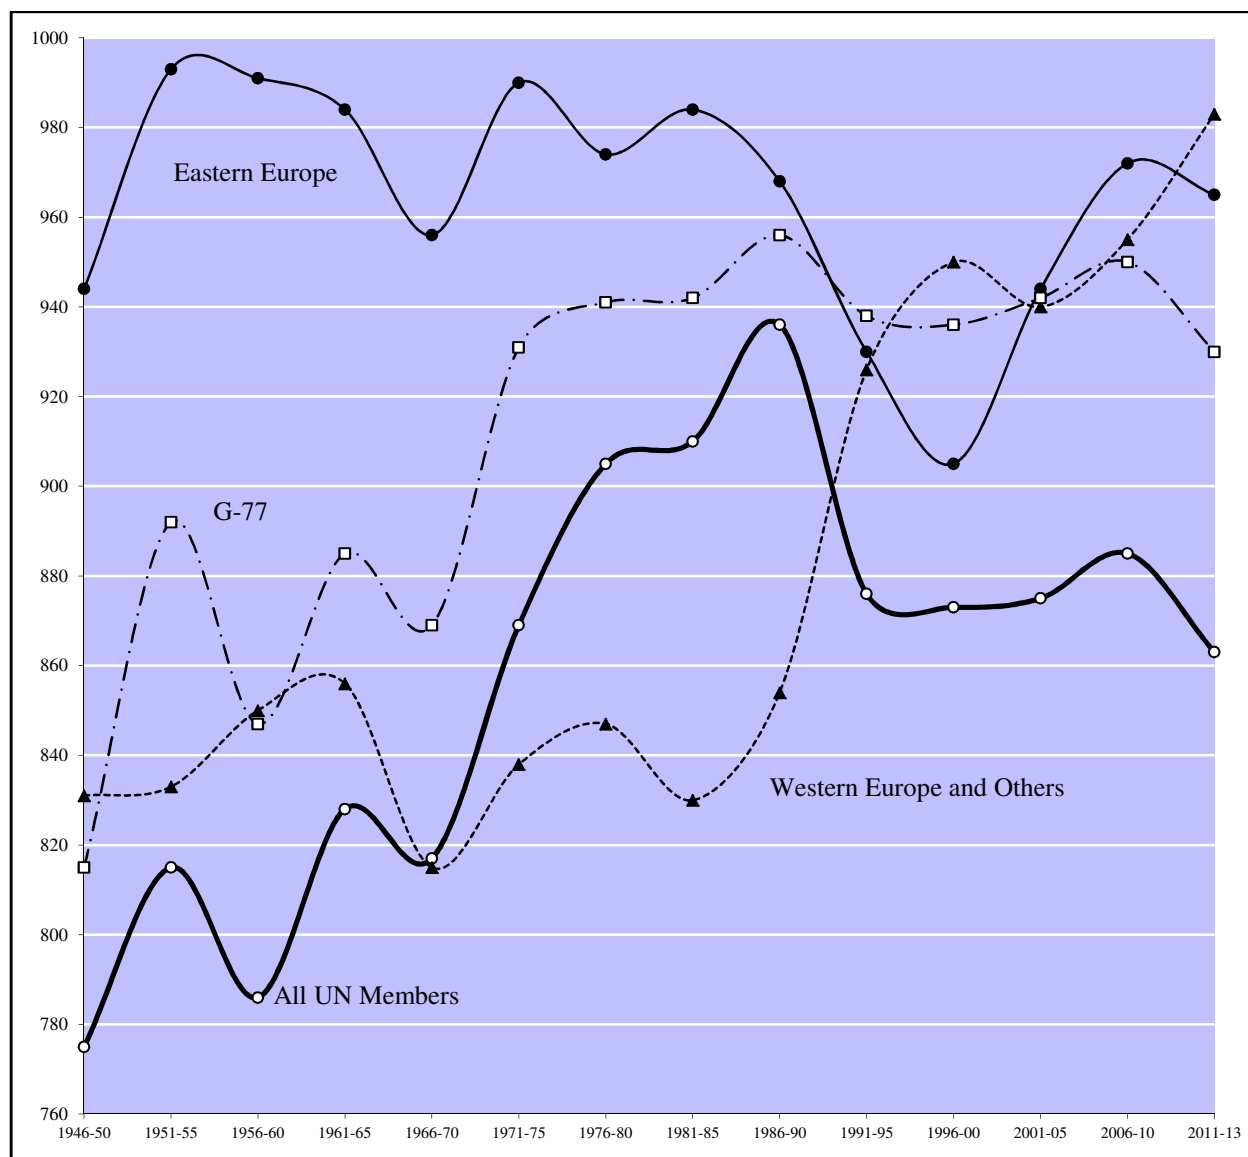

\* Through December 2013.

\*\* Belgium, France, Luxembourg and Netherlands. The Federal Republic of Germany and Italy were not yet UN Members.

\*\*\* Includes the 132 members in 2013. The IC of all 140 countries that are or have been members of the G-77 is 930 (Cyprus, Democratic Yemen, Malta, Mexico, Palau, Republic of Korea, Romania and Yugoslavia).

Graph B

*Median of the CI among all UN Members, 1946-2013*

What has been the median of the Coincidence Index in the General Assembly on the different agenda items? Table D lists the five-year total number of resolutions adopted by a recorded vote under each of the ten main subject headings. Table E lists the five-year median of the CI among all UN Members on those subjects and Graphs C, D and E offer a picture of the evolution of the extent of agreement in the General Assembly.

TABLE D  
*Subjects of resolutions adopted by a recorded vote:
